

EXPLANATION

LAKE BOTTOM CONTOUR - Elevation of the lake bottom, in meters above mean sea level. Contour interval is variable. Shoreline elevation (water-level elevation of lake above mean sea level) is 89.92 meters

PLANNED CROSS SECTIONS - Cross sections were planned using the 1977 shoreline from the Utuado quadrangle. Therefore, they do not conform to the shoreline as surveyed in August 1994. Data for cross sections 34 to 41 were not recorded as individual profiles, but rather as random data
