

Table 1. Summary of well data, Antelope Valley.

[State well No., See "Well-Numbering System" section: USGS (U.S. Geological Survey) identification No., consists of latitude, longitude, and sequence number (used for cluster wells); well depth, perforations, and water-level depth, in feet below land surface; altitude of land surface and altitude of water level, in feet above sea level. Some well perforation bottom measurements are less than the well depth because of mifilling]

State well No.	USGS identification No.	Well depth	Perforations	Spring 1983 water level					Spring 1996 water level					Well notes		
				Top	Bottom	Altitude of land surface	Date of measurement	Depth	Altitude	Top	Bottom	Altitude	Date of measurement		Depth	Altitude
