ILLUSTRATIONS

Figure 1. Map showing location of streamflow-gaging stations with at least 10 years of streamflow data used in study.	3
---	---

TABLES

1. Summary of streamflow period of record used in study for selected continuous-record streamflow-gaging stations with at least 10 years of streamflow data from unregulated, regulated, and urban basins within and near Oklahoma	5
2. Summary of drainage area distribution of streamflow statistics analyses for streamflow-gaging sites	13

CONVERSION FACTORS, ABBREVIATIONS, AND VERTICAL DATUM

Multiply	By	To obtain
inch (in.)	25.4	millimeter
mile (mi)	1.609	kilometer
square mile (mi ²)	2.590	square kilometer
cubic foot per second (ft ³ /s)	0.02832	cubic meter per second

Sea level: In this report “sea level” refers to the National Geodetic Vertical Datum of 1929 (NGVD of 1929)—a geodetic datum derived from a general adjustment of the first-order level nets of both the United States and Canada, formerly called Sea Level Datum of 1929.
