IN REPLY REFER TO:

February 26, 2002

WRIR 99-4190 version 3

“Analysis of the magnitude and frequency of floods in Colorado”

Subsequent to publication of U.S. Water-Resources Investigations Report 99-4190, version 2:

- Table 1, the standard error of prediction for the 10-year peak in the Rio Grande region is 61.9, not 89.1.
- The errors for the Plains region have been rounded to three significant figures.

We apologize for any inconvenience.
