

LEGEND

FORMATIONS

Stratified drift

Observed rock outcrops
 (a) Crystalline rocks
 (b) Limestones
 (Areas not occupied by rock outcrops or stratified drift are covered with till)

VEGETATION

Woods
 (Areas not wooded are chiefly grass lands but in part cultivated fields)

GROUND WATER

Depth to water table more than 10 feet, generally less than 20 feet
 (In remaining areas depth is generally less than 10 feet. Water level undergoes seasonal fluctuations. Map shows approximate average conditions)

Dug or driven well

Drilled well

Spring

Numbers correspond to numbers used in tables

Base, from Sheffield, Sandsfield, Cornwall, and Winsted U. S. G. S. topographic atlas sheets

MAP OF SALISBURY AREA, CONNECTICUT

Showing rock outcrops, wooded areas, and ground-water conditions

Contour interval 20 feet

Datum is mean sea level

1915

Geology, ground-water conditions, and forest boundaries by A. J. Ellis
