

DEPARTMENT OF THE INTERIOR

ALBERT B. FALL, Secretary

UNITED STATES GEOLOGICAL SURVEY

GEORGE OTIS SMITH, Director

Water-Supply Paper 500

CONTRIBUTIONS TO THE HYDROLOGY
OF THE UNITED STATES

1921

NATHAN C. GROVER, Chief Hydraulic Engineer

WASHINGTON

GOVERNMENT PRINTING OFFICE

1922

CONTENTS.

	Page.
(A) Coeur d'Alene Lake, Idaho, and the overflow lands, by R. W. Davenport (published May 13, 1921).....	1
(B) Ground water for irrigation near Gage, Ellis County, Okla., by D. G. Thompson (published July 21, 1921).....	33
(C) Some characteristics of run-off in the Rocky Mountain region, by Robert Follansbee (published January 21, 1922).....	55
Index.....	73

ILLUSTRATIONS.

	Page.
PLATE I. Map of Spokane River basin, Idaho and Washington.....	4
II. Diagram showing details of elevations of old and new dams on Spokane River at Post Falls, Idaho.....	10
III. Profile and cross sections of Spokane River from outlet of Coeur d'Alene Lake to Post Falls, Idaho.....	24
IV. A, Flowing well half a mile east of Gage, Okla.; B, Near view of flowing well near Gage, Okla., showing discharge.....	44
FIGURE 1. Diagram showing fall of water level of Coeur d'Alene Lake, Idaho, during summer before and after operation of bear-trap dam in relation to water-surface area.....	4
2. Comparison of actual hydrograph for heights of Coeur d'Alene Lake, Idaho, in flood of January, 1918, and estimated hydrograph assum- ing storage in lake to level of 2,124 feet at beginning of flood....	16
3. Comparison of actual hydrograph for heights of Coeur d'Alene Lake, Idaho, in flood of May, 1917, and estimated hydrograph assuming storage in lake to level of 2,126.5 feet on April 6.....	17
4. Diagram showing elevation of water level of Coeur d'Alene Lake, Idaho, on given dates before and after the operation of the bear- trap dam at Post Falls and area of lands overflowed at different levels above 2,120 feet.....	19
5. Map of part of northwestern Oklahoma.....	35
6. Diagrammatic cross section between Gage, Okla., and Wagon Mound, N. Mex., showing probable structure of "Red Beds," source of water, and cause of artesian flow at Gage, Okla.....	38
7. Theoretical cross section showing possible structure near Gage, Okla., and source of water in flowing well at Gage.....	39
8. Typical hydrograph of a Rocky Mountain stream (Roaring Fork at Glenwood Springs, Colo., for the year ending September 30, 1918).	
9. High-water hydrograph for Arkansas River at Salida, Colo., show- ing relation between temperature and daily discharge.....	57

	Page.
FIGURE 10. High-water hydrograph for Uncompahgre River below Ouray, Colo., showing relation between temperature and daily discharge.	58
11. High-water hydrographs for Uncompahgre River below Ouray, Colo., showing relation between temperature and maximum discharge.....	59
12. High-water hydrographs for Colorado River at Hot Sulphur Springs, Colo., showing relation between temperature and maximum discharge.....	60
13. Discharge graph of Roaring Fork at Glenwood Springs, Colo., showing diurnal fluctuations.....	61
14. Discharge graph of Uncompahgre River below Ouray, Colo., showing diurnal fluctuations.....	61
15. Discharge graph of Tensleep Creek near Tensleep, Wyo., showing diurnal fluctuations.....	62
16. Discharge graph of Roaring Fork at Glenwood Springs, Colo., showing relation between temperature and mean and hourly discharge.....	63
17. Winter hydrographs for streams of different-sized drainage areas.	70
