WASHINGTON : 1932

CONTENTS

[The letters in parentheses preceding the titles are those used to designate the papers for advance publication]

	Page
(A) A method of estimating ground-water supplies based on discharge by plants and evaporation from soil—results of investigations in Escalante Valley, Utah, by W. N. White.....	1
(B) Geology and ground-water resources of the Dalles region, Oregon, by A. M. Piper.....	107
(C) Index of analyses of natural waters in the United States, by W. D. Collins and C. S. Howard.....	191
Index.....	207

ILLUSTRATIONS

	Page
PLATE 1. Map of Escalante Valley, Utah, showing topography, hydrology, and land classification.....	In pocket.
2. A, Automatic water-stage recorder; B, Automatic water-stage recorder installed over an auger-hole well in a field of greasewood.....	42
3. A, Field of naturally subirrigated alfalfa near Milford, Utah; B, Salt-grass meadow near Milford, Utah.....	42
4. A, Heavy stand of greasewood near Milford, Utah; B, Heavy stand of rabbit brush near the dry bed of the Beaver River, in the Escalante Valley, Utah.....	42
5. A, Field of shad scale and greasewood, with shad scale dominant; B, Thicket of young willows in the former bed of the Beaver River, near Milford, Utah.....	43
6. A, Recorder over a well at center of a circular tract with radius of 20 feet from which greasewood was cleared; B, General view of experiment station maintained by the United States Geological Survey near Milford, Utah.....	74
7. A, Part of the Milford experiment station; B, Partly dismantled experiment station, November, 1927.....	74
8. A, Salt-grass and greasewood tanks with automatic water feed; B, Greasewood tank at the end of the experimental work, in November, 1927.....	74
9. A, Alfalfa tank equipped with automatic water feed and water-stage recorder; B, 12-foot evaporation tank at the Milford experiment station.....	74
10. A, Cylinder used in tests of specific yield; B, Process of sealing the bottom of the cylinder.....	74
11. Geologic map of the Dalles region, Oregon, showing location of typical wells and springs.....	In pocket.

	Page
PLATE 12. Valley of Columbia River at The Dalles, Oreg., showing Five-mile Rapid and stream terrace north of the river.....	134
13. Valley of Threemile Creek showing terrace of older alluvium, on which most of the orchard tracts are located.....	134
14. A, Coarse andesitic agglomerate about 35 feet above the base of the Dalles formation; B, Cross-bedded conglomerate about 175 feet above the base of the Dalles formation..	134
15. A, Cross-bedded sand, gravel, and boulders of the older alluvium; B, Sand and gravel of the intermediate alluvium.....	135
16. Tentative correlation of water-bearing beds penetrated by typical wells near The Dalles, Oreg.....	150
17. Diagrammatic summary of operation of well of the Cherry Hill District Improvement Co., in the 1930 irrigation season.....	150
18. Fluctuations of water surface in The Dalles municipal well, also fluctuations in barometric pressure at The Dalles and Portland, Oreg., June 3 to 28, 1930.....	158
19. Fluctuations of water surface in The Dalles municipal well in the period 1926-1930.....	158
FIGURE 1. Map of Utah showing location of Escalante Valley and Milford experiment station.....	12
2. Map of the vicinity of Milford, Utah, showing outline of area of ground-water discharge, part of the observation wells, and cultivated lands that are irrigated or naturally subirrigated..	20
3. Daily fluctuations of the water table in a naturally subirrigated alfalfa field.....	26
4. Daily fluctuations of the water table in a naturally subirrigated alfalfa field.....	27
5. Daily fluctuations of the water table in a salt-grass meadow..	31
6. Daily fluctuations of the water table in a salt-grass meadow..	32
7. Daily fluctuations of the water table in a field of greasewood..	35
8. Daily fluctuations of the water table in a field of greasewood..	36
9. Daily fluctuations of the water table in fields of rabbit brush..	37
10. Daily fluctuations of the water table in fields of shad scale and of shad scale associated with greasewood and rabbit brush...	38
11. Daily fluctuations of the water table in a field of pickleweed....	39
12. Daily fluctuations of the water table in a thicket of willows....	40
13. Daily fluctuations of the water table in a meadow of assorted grasses.....	41
14. Comparison of daily fluctuations of the water table in a field of alfalfa and in an adjoining bare field.....	42
15. Comparison of daily fluctuations of the water table in fields of greasewood and in cleared land.....	43
16. Comparison of daily fluctuations of the water table in a field of greasewood and shad scale and in adjoining bare land.....	44
17. Daily fluctuations of the water table in a field of alfalfa before and after alfalfa was cut.....	45
18. Daily fluctuations of the water table in a salt-grass meadow before and after the salt grass was cut.....	46
19. Daily fluctuations of the water table in a field of greasewood before and after plants were cut.....	47
20. Comparative effects of a light summer shower on daily fluctuations of the water table in an alfalfa field and in an adjoining cleared field.....	49

	Page
FIGURE 21. Comparative effects of rains on daily fluctuations of the water table in an alfalfa field during different times of the year...	50
22. Comparative effects of a shower, August 28, 1927, on daily fluctuations of the water table in fields of different kinds of ground-water plants.....	51
23. Typical seasonal fluctuations of the water table in fields of ground-water plants.....	56
24. Diagrammatic cross section of experimental vegetation tank...	59
25. Comparison between daily fluctuations of the water table in the alfalfa tank (No. 1) and Hendrickson's alfalfa field.....	67
26. Variations in ground-water evaporation with depth of water table, expressed in percentage of evaporation from 12-foot tank with free water surface.....	80
27. Map of the area of ground-water discharge in the Milford district, Utah.....	85
28. Map of the principal area of ground-water discharge in the Beryl district, Utah.....	92
29. Hydrographs of the south fork of the Mills River at the Pink Beds, Pisgah National Forest, N. C.....	95
30. Map of Oregon showing location of the Dalles region.....	109
31. Annual rainfall and departure from average rainfall at The Dalles, Oreg., for the period 1876 to 1930.....	114
32. Fluctuations of water surface in wells of Ray F. Kelley and of the Cherry Hill District Improvement Co. in relation to periods of pumping.....	152
