

**EXPLANATION**

Depth of water table below land surface, in feet

0-25
25-50
50-100
100-200
200-300
Perched water table

○ Domestic or stock well in which depth to water level was measured once

⊙ Irrigation well in which depth to water level was measured once

⊕ Test hole

⊗ Observation wells in which depth to water level was measured periodically

140 Number corresponds to well number or test-hole number in table

3900 Contour lines on the water table  
Contour interval 10 feet  
Datum is mean sea level

Base drawn from General Highway and Transportation Map, Box Butte County, Nebraska, prepared by Nebraska Department of Roads and Irrigation in cooperation with U. S. Department of Agriculture, Bureau of Public Roads.
