

EXPLANATION

-  Area underlain by Talbert water-bearing zone
-  Area in which chloride content of principal water bodies exceeds 50 parts per million
-  Lines of equal chloride content in principal water bodies, in parts per million
Dashed where approximate
-  Fault
Dashed where approximate, dotted where concealed. U, upthrown side; D, downthrown side
-  Well for which chemical analysis is available for the period indicated
Numbers refer to analytical data in tables

MAPS OF THE SANTA ANA GAP AND VICINITY SHOWING EXTENT OF CONFINED WATERS CONTAINING MORE THAN 50 PARTS PER MILLION OF CHLORIDE
