

Compilation of Records of Surface Waters of the United States through September 1950

Part 8. Western Gulf of Mexico Basins

GEOLOGICAL SURVEY WATER-SUPPLY PAPER 1312

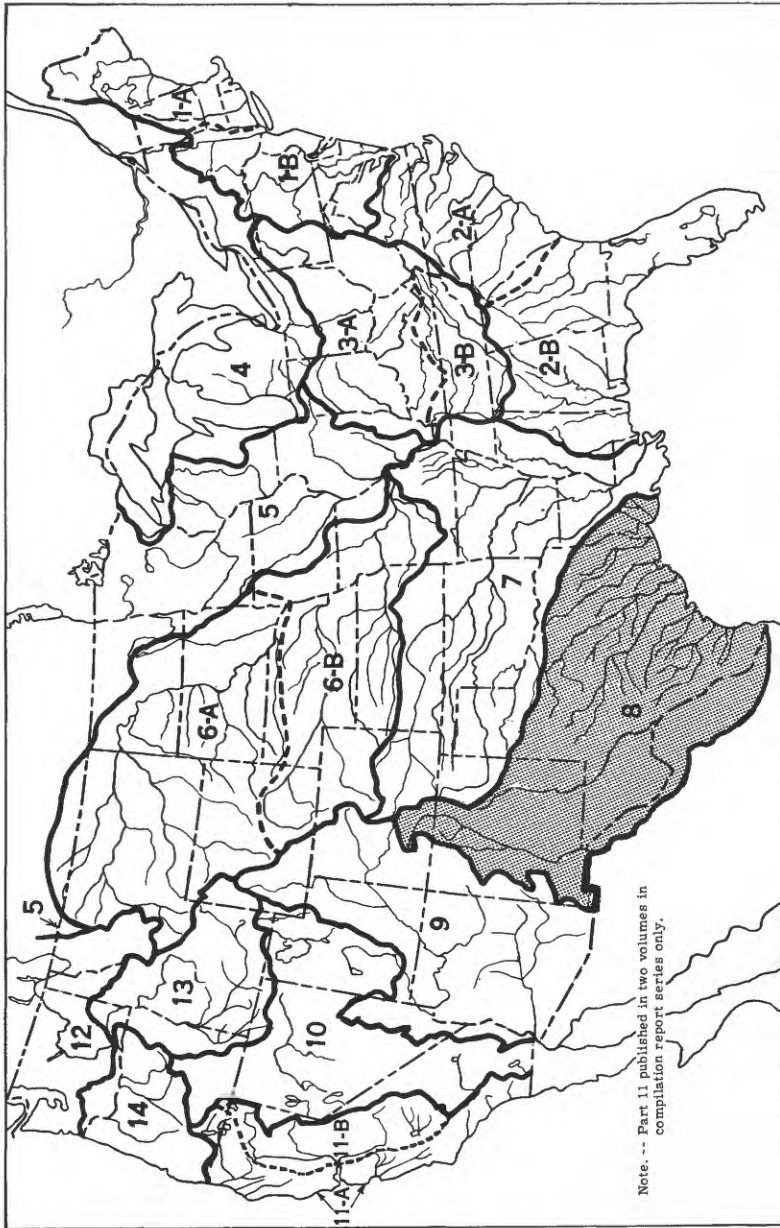

Figure 1. —Map of the United States showing areas covered by the annual reports on surface-water supply and by the present series of compilation reports. The area covered by this report is shaded.

Reports on surface-water supply containing records from 1899 to 1950 for drainage basins in this report are listed in the following table. The data for any particular gaging station will, in general, be found in the reports covering the years during which the station was maintained.

The records at most of the stations discussed in these reports extend over many years. Miscellaneous measurements at many points other than regular gaging stations have been made each year and are published under "Miscellaneous discharge measurements" at the end of each report.

Reports also have been published that are compilations of records for various areas, usually a single State or drainage basin. These reports contain records previously published (some of which may have been revised), as well as some records not contained in the annual series of water-supply papers. The following table lists reports of this type for Western Gulf of Mexico basins.

Reports containing compilations of records of discharge by States and drainage basins

W. S. P.	Period	Report
74.....	1884-1900	Water resources of Colorado.
358.....	1888-1913	Water resources of Rio Grande basin (Colo., N. Mex., Tex.)
850	1898-1937	Summary of records of surface waters of Texas.

Records of discharge have been published also in State reports. Some of these are not contained in the publications of the Geological Survey or are revisions of records previously published in its water-supply papers. The following table contains a list of these reports for the area covered by this report.
