

EXPLANATION

- 3567
Test hole, seismograph shothole, or well for which log is given in table 27
- 4021
Test hole, seismograph shothole, or well for which log is given in table 28
- Number is altitude of surface of Pierre shale
Shown only in part of area where Pierre shale is overlain by White River group
- Approximate subsurface contact of Pierre shale and White River group
- Contours drawn on bedrock surface
Pierre shale or White River group
Dashed where control is less accurate. Contour interval 20 feet. Datum is mean sea level

MAP SHOWING LOCATION OF TEST HOLES AND THE CONFIGURATION OF THE BEDROCK SURFACE
IN FRENCHMAN CREEK BASIN
