

EXPLANATION

- $\frac{30}{5050}$
Measured section of deposits of Rim terrace at edge of YU Bench
Slant number is thickness of terrace deposits, in feet. Upright number is altitude of bedrock, in feet above mean sea level
- $\frac{27}{5408}$
U. S. Bureau of Reclamation test hole
Slant number is thickness of deposits of Rim terrace, in feet. Upright number is altitude of bedrock, in feet above mean sea level
- 5400 —
Contour drawn on bedrock surface
Dashed where approximately located. Contour interval 20 feet, datum is mean sea level
