

MAP OF THE TOWN OF SOUTHOLD, LONG ISLAND, NEW YORK, SHOWING LOCATION OF WELLS
AND POSITION OF THE WATER TABLE IN JULY 1959

- EXPLANATION**
- 16 777
○ 5.27
Observation well
Upper figure is well number; prefix "S" omitted for convenience. Lower figure is altitude of water table
 - 7283
Well for which hydrograph is given in figure 4
 - 5475
Well which yielded water of high chloride concentration
 - 10 091
Well for which log is given in table 3, or log is shown graphically on geologic section
 - +
 - Precipitation station
 - Approximate center of populated area mentioned in report
 - 2 —
Water-table contour
Dashed where approximate. Contour interval 1 foot. Datum is mean sea level. Arrows indicate approximate direction of movement of ground water
 - A ——— A'
Line of geologic section
See report for description of hydrologic areas A-D
