PRECIPITATION MAP OF THE CONTINENTAL UNITED STATES

EXPLANATION

- Isohyetal line: Shows precipitation in inches; interval irregular.
- Boundary of water-resource region: See also plate 4.

Prepared from Isohyetal Map by U.S. Department of Commerce, Weather Bureau data based on 30 year normals, 1921-1950 of 276 stations, supplemented by approximately 1800 long-term station averages in western and eastern mountain areas.

Prepared for Select Committee on National Water Resources of the United States Senate by the United States Department of Agriculture, 1959.
