EXPLANATION

- Topographic divide between Mobile and Tennessee River basins
- Boundary of streamflow recession index area
- Boundary of area where 7-day, 2-year low flow is less than 0.3 cubic foot per second and 7-day, 10-year low flow is less than 0.1 cubic foot per second
- ▲ Stations used in the regression analyses. Top number is station identification; bottom number is streamflow recession index
- △ Station where 7-day, 2-year low flow is less than 0.3 cubic foot per second and 7-day, 10-year low flow is less than 0.1 cubic foot per second. Number is station identification
