

INDEX

A	Page
Abstract.....	1-4
Allapattah Marsh, description.....	143
Anastasia formation, age.....	66, 100
lithologic features..66, 100, 101, 120, 122	
occurrence and distribution.....	100, 101
water-bearing characteristics..66, 101, 102	
Annual runoff, data of selected drainage	
basins.....	513, 514, 515, 516
Appendix.....	835-948
Aquifer, definition.....	157
Aquifer at Everglades, description.....	196-197
Aquifers at Fort Pierce and in the	
Kissimmee valley, description.....	194-196
Arbuckle Creek, description.....	311-312
Arca zone, description.....	70
Arch Creek, origin.....	125, 127
Areal studies, characteristics.....	509
Everglades.....	509-510
west of Hialeah.....	510
Artesian aquifer, functioning.....	159
Artesian aquifer at Indian Town,	
description.....	193-194
Artesian head, general statement.....	159
Artesian water, chemical character.....	326
definition.....	158-159
general statement.....	188
shallow aquifers.....	193-197
Atlantic Coastal Ridge, deep sand-filled	
Pleistocene channels through.....	150-151
description.....	145
Atlantic Coastal Ridge in Broward County,	
aquifer and ground water.....	169-171
development of wells.....	172
effects of.....	171-172
Atlantic Coastal Ridge in Palm Beach	
County, aquifer and ground	
water.....	172-173
development of wells.....	175
effects of drainage.....	174
Atlantic Coastal Ridge in St. Lucie County,	
aquifer and ground water.....	176
development of wells.....	176
Atlantic Coastal Ridge north of Greater	
Miami, aquifer and ground	
water.....	168-169
Atlantic Coastal Ridge south of Greater	
Miami, aquifer and ground	
water.....	167
development of wells.....	167-168
Atlantic Coastal Ridge north of Miami,	
development of wells.....	169
Atlantic Ocean, chemical	
composition.....	572-573
contamination by.....	572-573
specific gravity.....	573-574
Avon Park limestone formation, age.....	67
lithologic features.....	67, 68
water-bearing characteristics.....	67

B	Page
Bar and swale topography,	
description.....	123-124, 139, 142, 143, 152
Base exchange, description.....	578-579, 821-822
Base flow, explanation.....	524-528
Base storage, explanation.....	528, 530
Basins tributary to Lake Okeechobee,	
characteristics.....	300
general drainage system.....	300-301
"Bays," origin.....	125
Beach sand, age.....	111
Beach sand, fossil identification.....	111
lithologic features.....	111
occurrence and distribution.....	110, 111
Bicarbonate, in ground water.....	733
Big Cypress-Devil's Garden area, aquifer	
and ground water.....	186
development of wells.....	186
Big Cypress Swamp, description.....	144-145
Big Pine Key, description.....	61, 146, 155, 157
ground-water tidal fluctuation.....	177
Biscayne aquifer, compared to Floridan	
aquifer at Jacksonville, Fla., and	
Savannah, Ga.....	270
description.....	160-162, 166, 198
factors affecting.....	199
occurrence and water.....	96
perennial yield.....	200
Pleistocene building.....	94
recharge rates.....	220-221
response to pressure changes.....	198-199
salt-water encroachment.....	200
transmissibility and storage	
coefficients.....	269-270
well yields.....	162-163
Biscayne Bay, chloride concentration.....	574-577
ground-water discharge into.....	592-593
salt-water contamination.....	574-577
Biscayne Canal, salt-water	
encroachment.....	645-652
Boynton Canal, description.....	502-505
Brevard County, precipitation.....	22-40
rain gages.....	18
Broward County, chemical character of	
nonartesian ground waters.....	797-800
chemical character of public water	
supplies.....	828, 830
development of wells.....	172
effect of drainage.....	171-172
municipal water supplies.....	919-922
precipitation.....	22-40
rain gages.....	18
salt-water encroachment.....	171-172
well logs.....	859-870
well records.....	836-837
Buckingham formation, fossil	
identification.....	87
lithologic features.....	87

C	Page	Page
Calcareous rocks, solution.....	90, 96-99, 104, 128-129, 132-134	
Calcium, in ground water.....	731-732	
Caloosahatchee Canal, chemical character of water.....	751-755	
Caloosahatchee marl formation, age of.....	67, 89	
fossil identification.....	87	
lithologic features.....	67, 88, 89	
occurrence and distribution.....	87, 88	
water-bearing characteristics.....	67, 89, 118, 119	
Caloosahatchee River, <i>Cancellaria</i> zone.....	70	
capillary fringe.....	221	
cation exchange.....	578-579, 821-822	
dates of canal construction.....	587	
description.....	141	
Camp Murphy, wells.....	175	
Campbell, Robert B.....	65	
Cenozoic era, time correlation.....	111	
Charlotte County, precipitation.....	22-40	
rain gages.....	18	
Chemical character of artesian water, general statement.....	826-833	
Chemical character of nonartesian ground waters, general statement.....	784-785	
Chemical character of surface waters, general statement.....	737-784	
Chemical quality of nonartesian ground waters, areas surrounding Lake Okeechobee.....	806-822	
Chemical quality of surface waters, effect of drought on Everglades canals.....	784	
major Everglades drainage canals.....	755-779	
miscellaneous sampling.....	779-783	
Chloride, description in ground water.....	733-734	
Chlorides, taste levels of human perception.....	96	
U. S. Public Health Service standards.....	96	
Choctawhatchee marl, description.....	70	
Circular ponds, origin and description.....	141-142	
Climate, general statement.....	15-57, 132	
Climatic effects on topography, general statement.....	132	
Climatic Optimum, definition.....	125	
Climatologic data, analysis.....	516-524	
Coastal areas north of Miami, chemical character of nonartesian ground waters.....	792-796	
Coastal marshes and mangrove swamps, description.....	154	
Coconut Grove, early springs.....	581	
ground water in early days.....	580	
well field established.....	705	
Coconut Grove well-field, salt-water encroachment.....	707	
Coefficient of permeability, definition.....	236-237	
Coefficient of storage, definition.....	237	
Coefficient of transmissibility, definition.....	237	
Collier County, chemical character of nonartesian ground waters.....	822-825	
chemical character of public water supplies.....	830	
contamination of shallow ground water by salty artesian water.....	192	
Cory No. 1 well, water analyses.....	65	
Everglades City aquifer and ground water.....	196-197	
municipal water supplies.....	923	
precipitation.....	22-40	
rain gages.....	18	
well records.....	836	
Color of ground and surface waters, general statement.....	730	
Cooke, C. Wythe.....	70	
Coral Gables Canal, salt-water encroachment.....	667-674	
Corrosiveness of ground water, general statement.....	737	
"Coskinolina zone" of Stubbs, general statement.....	87	
Cushman, J. A.....	81, 82	
Cutler, interpretations of apparent resistivity curves at.....	942-945	
Cutler area, measurements of salt-water encroachment by electrical- resistivity studies.....	718-721	
Cypress Creek Canal, chemical character of waters.....	776	
description.....	505-507	
D		
Dade County, chemical character of Biscayne aquifer water.....	792-796	
chemical character of public water supplies.....	828, 830	
estimated pumpage of ground water.....	236	
municipal water supplies.....	924-927	
precipitation.....	23-40	
rain gages.....	18	
well logs.....	871-901	
well records.....	839-848	
Dade County shoreline, salt-water encroachment.....	708-711	
Dams, salt-water controls.....	590, 640, 652, 705	
Dania, aquifer and ground water near.....	168-169	
Dania Cutoff Canal, salt-water encroachment from.....	171	
Darcy's law, general statement.....	206, 274	
Density of ground water, effect on water-table elevation.....	613-617	
De Soto County, precipitation.....	22-40	
rain gages.....	19	
Development of area, problems.....	9-11	
Devil's Garden, description.....	186	
<i>Dictyoconus americanus</i> zone of Cole.....	68	
<i>Dictyoconus cooki</i> zone of Cole.....	68	
Direct flow, explanation.....	524-528	
Dissolved solids, general statement.....	735	
Drainage, results.....	9-11	
Drainage canals, salt-water encroachment from.....	682-686	
time of construction.....	587	
Droughts, description.....	33-40	
Droughts and salt-water encroachment, general statement.....	587-588 679-681, 784	
Duplin marl formation, age.....	70, 71	
fossil identification.....	70-82	
lithologic features.....	70	
occurrence and distribution.....	70	
E		
<i>Eophora</i> zone.....	70	
Effective recharge, definition.....	281	
Electrical resistivity, studies.....	712-725	
Eocene series, general statement.....	64	
Equivalents per million, defined.....	577	
Erosion, description.....	134-135, 147, 155	
of channels through the Atlantic Coastal Ridge.....	150-151	
Evaporation, general statement.....	42-57	
methods of computation.....	516, 524	
computation.....	516, 524	

	Page
Evapotranspiration, general statement.....	42-57
salvage.....	285-287
Everglades, central, aquifer and ground	
water.....	183-184
development of wells.....	184
quality of water.....	183-184
seepage.....	184
Everglades, lower, aquifer and	
ground water.....	179-180
development of wells.....	180
seepage.....	183
Everglades, lower, west of Hialeah,	
water-table conditions.....	180-183
Everglades, The, chemical character of	
nonartesian ground water.....	818-821
description.....	147-148
drainage pattern.....	152-153
flow.....	149-151
geologic history.....	118-125
"grain".....	152
rock floor.....	149-151
soils.....	148-149
solution of rock floor.....	151
source of mineralization of ground	
waters.....	821-822
